Subject: Information Protocol (Agenda item 5) POC Meeting June 10, 2021

CAUTION: External Email. Proceed Responsibly.

Esteem Commissioners and Community Members,

On a monthly basis, Probation manually collects statistical data from Deputy Probation Officers assigned to the field operations and the Intake Detention Control unit. This information is essential to understanding the efficiency and efficacy of the Department's operations. It is easily redacted of personal/client identifying information and should be shared with the POC and the public on a monthly basis.

This information can also be used as a base point for any additional information that the POC may need for assessing operational concerns. Adding a column to the spreadsheets used would not affect the workload of the deputies or managers unless a caseload is above yard stick.

As it stands, it is virtually impossible to get this information from the administration, even for someone like me who knows exactly what information is available.

As the POC considers information collection protocol, it would be invaluable to have this information routinely shared as a primary protocol.

Thank you for your time,

Eduardo Mundo
Supervising Deputy Probation Officer (retired)
